

Specification Grade Insulated Bushings

For Rigid Metal Conduit, IMC & EMT

Types B, HB, AB, RB, SB, SBT

Use:

To protect insulated conductors from abrasion during pulling and from mechanical vibration.

To provide voltage gradient between live conductors and ground at point of electrical and mechanical stress on conductor insulation.

Features:

- Molded-on high impact phenolic thermosetting insulation
- UL insulation temperature rating 150°C
- Positive metallic conduit stop

Material/Finish:

For Threaded Rigid and IMC

Type B: ½" & ¾" - Steel, Zinc Plated

1" to 6" - Malleable Iron, Zinc Plated

Type HB: ½" & ¾" - Steel, Mechanical/Hot Dip Galvanized

1" to 6" - Malleable Iron, Mechanical/Hot

Dip Galvanized

Type AB: Aluminum Bushing

Type RB: Bronze, for highly corrosive atmospheres

For Threadless Rigid and IMC

Type SB: ½" & ¾" - Steel, Zinc Plated with Stainless Steel screws

1" to 6" - Malleable Iron/Zinc Plated with Stainless Steel screws

For EMT

Type SBT: ½" & ¾" - Steel, Zinc Plated with Stainless Steel screws

1" to 6" - Malleable Iron/Zinc Plated with Stainless Steel screws

Options:

Type B insulated bushings are also available for threadless rigid and IMC in the following materials:

Type HSB: Malleable Iron or Steel
Mechanical/Hot Dip Galvanized

Type ASB: Aluminum

Type RSB: Bronze

Third Party Certification:

UL Listed: E-11853

CSA Certified: 011584

Applicable Third Party Standards:

UL Standard: 514B

CSA Standard: C22.2 No. 18

Fed. Spec: W-F-408E

NEMA: FB-1

**Type B
Threaded**

**Type SB
Threadless**

Note:

1 A Mechanically Galvanized finish provides a plating thickness equivalent to Hot-Dip process, meeting ASTM A-153 performance criteria.

Unlike the Hot-Dip process, mechanical galvanizing provides plating on all machined and/or threaded surfaces.

2 Caps to prevent entry of foreign matter into conduit prior to pulling cables are available.

See Type PPC on page DB1.

Suggested Specification:

O-Z/Gedney Type B insulated bushings of malleable iron or steel, with conduit end stop and integrally molded noncombustible phenolic insulated surfaces rated 150°C shall be used on the ends of all raceways containing No. 4 or larger conductors.
